
SAFETY

The Superintendent or his/her designee will develop rules governing school safety which shall include but not be limited to: pupil safety in school; care of injured pupils; vehicle safety programs; plant safety including removal and/or encapsulation of asbestos; labeling and storage of hazardous substances; emergency procedures; pupil safety in transit to and from school; and eye protection. In addition, pupils shall be provided with safety instruction in accordance with the law.

Use and Storage of Hazardous Substances

The Board will not allow the use of any hazardous substances in or on any of the buildings or grounds of this district when children are present, except in emergencies. Any application of a hazardous substance will be conducted within and according to the guidelines and instructions provided by the manufacture and OSHA. A list of substances that are legally exempted from this requirement can be obtained from the Superintendent or his/her designee.

The Superintendent or his/her designee will inform the Board when hazardous substances may be used when children are present, and the board shall determine if an emergency situation exists and such use is warranted.

If any hazardous substance is stored on any school site, the Superintendent or his/her designee shall make available the hazardous substance fact sheet for that substance to anyone who requests it.

At least two days prior to the start of any construction activity involving hazardous substances, the Superintendent or his/her designee will post on a bulletin board at the school a notice that such construction will take place. The notice will state the activity to be conducted and the hazardous substance(s) to be used.

The Superintendent or his/her designee will ensure that all parents/guardians receive a notice at least once a year informing them of the following:

- A. Notice of any construction or other activities involving hazardous substances will be posted on the bulletin board of their children's school;
- B. Hazardous substances may be stored at the school at various times throughout the year; and
- C. Hazardous substance fact sheets for any of the hazardous substances being used or stored are available at the school.

Soil Contamination on School Property

The Board will ensure that notice of soil contamination on school property is provided. Notice will be provided to each parent or guardian of a student enrolled at the school, and to each staff member of the school. Notice will be provided within ten (10) business days of the discovery of the soil contamination, when the contamination is found by the Department of Environmental Protection or a licensed site remediation professional to exceed the department's direct contact soil remediation standards for residential use.

The notice shall include:

- A. A description of the soil contamination and the conditions under which a student or staff member may be exposed to the contamination;
- B. A description and timetable of the steps that have been taken and will be taken to ensure that there is no contact by any student or staff member with the contamination; and
- C. A description and timetable of the steps that have been taken and will be taken to remediate the soil contamination.

The notice may be provided by:

- A. Written notice sent home with the student and provided to the staff member;
- B. Telephone call;
- C. Direct contact; or
- D. Electronic mail.

The District will also post a copy of the notice in a conspicuous location near the site of the contamination to notify any other users of the school grounds of the existence of the contamination.

Implementation

The rules and procedures shall be reviewed and adopted by the board as required by law and shall be disseminated to staff and pupils annually, and whenever changes are made.
