### HIV PREVENTION EDUCATION

The Board believes HIV education should be integrated into the comprehensive health education curriculum, but may also be applied to other curriculum areas as well.

The District HIV education program must address, at a minimum, the nature, transmission, prevention and effects of the disease. The program shall be provided through a coordinated sequential elementary and secondary curriculum, taking into consideration the age, growth, development and maturity of the pupils and the subject matter of the course. Development of the program should also take into account the instructional needs of all pupils in the District.

The Superintendent or his/her designee will ensure that the information presented as a part of the HIV prevention education program is articulated in such a way that transition from grade to grade in the elementary schools and from elementary to secondary approaches to the material will be appropriate for all pupils.

The Superintendent or his/her designee will be responsible for the preparation and development of an HIV prevention education program, with active consultation and participation of an advisory committee consisting of teachers, administrators, parents/guardians, pupils (as appropriate), as well as any physicians, members of social and health service agencies, members of the clergy and representative members of the community that wish to participate. The Board will appoint the members of the committee upon the recommendation of the Superintendent or his/her designee. The advisory committee shall be responsible for reviewing the instructional program and all materials to be used and, through the Superintendent or his/her designee, recommending same for Board adoption.

The Superintendent or his/her designee will ensure that all staff involved in teaching the HIV prevention education program are properly certified for the subject area in which they are teaching and adequately prepared to teach the material. As necessary, appropriate staff training shall be provided.

Upon request, the HIV education curriculum will be made available to parents/guardians for their review. The Superintendent or his/her designee will establish procedures whereby pupils whose parents/guardians present to the Building Principal a signed statement that a designated part of the instruction is in conflict with his/her conscience, morals or religious beliefs will be excused from that part of the curriculum. An alternative educational opportunity shall be provided during the time a pupil is excused from part or the entire program. Such alternative educational opportunity will include topics that do not conflict with the parents/guardians beliefs, but which do fall within the same subject area (i.e. comprehensive health education) as the program from which the

pupil is excused. There will be no loss of class credit or credit toward graduation from such an exemption.

The Superintendent or his/her designee will establish a process for evaluating and updating the HIV prevention education program to incorporate new information. Any such revisions will be implemented after consultation with and review by an advisory committee as described above.

The Board, upon the input and recommendation of the Superintendent or his/her designee, will determine the content, sequence, and materials of the HIV prevention education program. The Board will ensure compliance with all requirements of applicable State and Federal law(s) concerning the content of the curriculum and distribution of materials.

Date: June 27, 2011
